

FAUZAN NUR HIDAYAT

FULLSTACK WEB DEVELOPER | GITHUB : FAUZANO5

OBJECTIVE

Aspiring digital product developer with a strong foundation in web development and a growing interest in iOS and game development. Passionate about creating impactful solutions—whether through engaging storytelling in games or empowering local communities and MSMEs with practical tech innovations. Eager to grow through collaborative learning, and to explore diverse ways technology can improve people's lives.

SKILLS

I am a fullstack web developer with hands-on experience in building scalable and maintainable web applications. I specialize in using PHP frameworks such as Laravel and CodeIgniter for backend development, and I also work with GoLang

EXPERIENCE

TECHNICIAN ASSISTANT • CV ROMTECH • JANUARY 2020 – SEPTEMBER 2020

Assisted in the production of digital mosque clocks and other automation tools using Arduino and ESP microcontrollers. Supported the development of web-based clock templates and programmed digital clocks using Arduino IDE. Also responsible for soldering electronic components prior to shipment to clients.

OPERATOR PRODUCTION • PT YAMAHA MUSIC MANUFACTURING INDONESIA • OCTOBER 2020 – OCTOBER 2023

My main responsibility was crafting electric guitar necks using various sanding machines, including drum sanders, grip sanders, whole sanders, and hand sanders. I ensured that each neck was shaped and smoothed according to design patterns and quality standards. Through this role, I developed strong attention to detail, consistency in manual craftsmanship, and the ability to work efficiently in a high-paced production environment.

FULLSTACK WEB DEVELOPER • JAKARTA INTERNATIONAL COLLEGE • JULY 2024 – NOW

Developed and maintained internal web-based systems to support company operations, using PHP frameworks such as Laravel and CodeIgniter. Handled both frontend and backend tasks, including designing databases, building user interfaces, developing business logic, and integrating third-party services. Focused on improving workflow automation, data accuracy, and system scalability to support cross-department collaboration.

using Fiber and GORM for building RESTful APIs. On the frontend, I utilize modern technologies including Vue.js, Nuxt.js, Tailwind CSS, and Bootstrap to deliver responsive and user-friendly interfaces. I'm also proficient in database management using MySQL, containerization with Docker, and API testing with Postman. I regularly apply unit testing to ensure code reliability and maintainability. While my current expertise is focused on web development, I'm eager to expand into mobile app development in the near future.

EDUCATION

VOCATIONAL HIGH SCHOOL • MAY 2019 • SMK NEGERI 2 KEBUMEN

Graduated from a vocational high school with a focus on electronics and audio/video systems. Gained hands-on experience in basic electronics, microcontroller programming (Arduino/ESP), and circuit assembly.

INFORMATION SYSTEMS (IN PROGRESS) • FEBRUARY 2026

(EXPECTED) • BINUS

ONLINE LEARNING

Currently a 7th-semester student majoring in Information Systems with a focus on software development, databases, and IT project management.

COMPETITION EXPERIENCE

RUNNER-UP – DISTRICT-LEVEL ELECTRONIC

APPLICATIONS

COMPETITION

LKS (Lomba Kompetensi Siswa) MKKS Kebumen, 2018

Achieved 2nd place in a regional vocational competition focusing on electronic applications. Demonstrated skills in circuit design, microcontroller programming, and problem-solving under time constraints.
